

Work from home internships for the students by Internshala.

COVID-19 pandemic has impacted every sector in the country including education. Summer internships have been impacted negatively and many students may be deprived of industrial exposure, in order to lessen its impact and promote social distancing, AICTE has associated with Internshala for an initiative - Chalo India, Let's Work from Home, which features 12,000+ work from home internship opportunities for students. This will not only help in removing the geographical barriers while doing an internship but would also offer flexibility in working hours.

Key highlights of the initiative -

- Work from home internships across all profiles like - engineering (mechanical/civil/IT/computer science etc), management, graphic design, and more
- All internships come with a certificate and stipend
- Includes easy-to-do internships like data entry, content writing, social media marketing, etc (helpful for 1st-year students)
- No financial implication on institute/ students.

Eligibility - All the students (1st year to final year) from all streams/branches are eligible to apply for these internships.

In this regard, kindly share this link with all your students through which they can directly apply to these internships - <https://bit.ly/aicte-wfh>. The last date to apply is 6th May.

For any other query, you may get in touch with Internshala's team at university.relations@internshala.com
